

DARK AWAKENINGS

ECONOMY

The Boon

Changeling economy is based around a single currency known as the “Boon”. In the early days, there was no currency. Everything was bartered for or earned. In time, people began to use tokens to give to those who had performed tasks for them, signifying that the recipient was owed a favour or Boon. People soon began to trade these amongst themselves in exchange for food, drink, and other services and it quickly became the standard form of currency.

Boons now take the form of small silver disks or rings, which will be provided by the game team. A ring is worth a single Boon, where a disk is worth 10 Boons.

Rarity

All items have a certain degree of availability and rarity. This will affect how many you may be able to acquire (if at all). Some things just cannot be bought, or people are not willing to sell them.

Common – Freely available; you can buy and many as you like.

Uncommon – These tend to be more expensive as there are fewer of these around. There are limited supplies based on a first come/first serve basis.

Rare – Limited in numbers, traders tend to keep hold of these sorts of items for their most favourite of customers. It is very difficult to acquire these.

Exotic – Nope... not happening. Anyone who has these sure as hell isn't just going to sell them. Mostly, these sorts of things are found rather than bought.
